

**RAB9A, RAB11A, AND MODULATORS THEREOF RELATED TO
INFECTIOUS DISEASE**

ABSTRACT OF THE DISCLOSURE

- 5 Disclosed herein are methods of reducing infection of a cell by a pathogen, for example to treat or prevent a pathogen infection. Exemplary pathogens include those that use a lipid raft. The disclosure also relates to methods of identifying agents involved in pathogen infection, such as modulators of Rab9A and Rab11A.
